Syed Asjad Abbas

AI/ML & Full-Stack Engineer · FastAPI · React.js · NLP · Real-Time Systems

asjadabbaszaidi@gmail.com · +92 303 323 6878 · LinkedIn · GitHub · Portfolio · Lahore, Pakistan

SUMMARY

Computer Science student at COMSATS University Islamabad with experience building and shipping AI, backend, and full-stack applications. Founder of Zeploy Tech and Junior AI/ML Engineer at Svype, with hands-on experience across AI/ML, FastAPI, React.js, Flutter, databases, streaming systems, and production deployments. Focused on building reliable software systems and turning technical requirements into deployed products.

EXPERIENCE

Svype | Junior AI/ML Engineer | *Aug 2026 – Present*

Previously Software Development Intern

• Converted from Software Development Intern to full-time Junior AI/ML Engineer, contributing to AI/ML solutions across internal tools and client projects.

• Contributed to TuneBox, a Flutter music streaming application by building UI modules, integrating REST APIs, and managing application state with Provider.

• Reduced frontend code duplication by 40% through reusable components for playback and playlist workflows

Zeploy Tech | Founder & Lead Engineer | *Apr 2026 – Present*

• Founded an AI-focused software studio and shipped full-stack products including EduCart and Gym Management System for client use.
• Designed and deployed applications using FastAPI, React.js, MySQL, JWT authentication, GitHub Actions, and Vercel.
• Led requirements, system design, development, deployment, QA, and post-launch maintenance across client projects.

Freelance | Backend & Full-Stack Developer | *2024 – Present*

• Delivered full-stack websites and business applications using FastAPI, React.js, MySQL, and JWT authentication. Worked across e-commerce, restaurant, and business management projects from development through deployment.

EDUCATION

COMSATS University Islamabad
Lahore Campus
B.S. Computer Science
2023 – 2027
ML · CV · NLP · Databases · OS

TECHNICAL SKILLS

LANGUAGES
Python · JavaScript · Java · SQL · C# · JavaScript

AI / ML
NLP · Deep Learning · BERT · DeepFace · OpenCV · HuggingFace Transformers · PyTorch · Whisper

FRONTEND
React.js · Flutter · Tailwind CSS ·

BACKEND
FastAPI · REST API Design · JWT Auth · WebSockets

DATABASES
MySQL · MongoDB Atlas · Firebase · PostgreSQL · Redis

DEVOPS & TOOLS
Git / GitHub · Docker · Vercel · CI/CD · Postman · Linux

CONCEPTS
System Design · REST Architecture · MVC · SDLC · OOP · Data Structures & Algorithms

PROJECTS

MockAI — AI Interview Evaluation System (FYP) *Python · FastAPI · React.js · MongoDB · BERT · DeepFace · Whisper*
• Developing a multimodal AI interview evaluation platform combining BERT semantic analysis, DeepFace emotion recognition, and Whisper-based speech transcription into a unified assessment pipeline.
• Built a structured feedback engine for evaluating confidence, coherence, and domain knowledge with actionable improvement insights.

ZePlay — Adaptive Video Streaming Platform *React · TypeScript · FastAPI · PostgreSQL · Redis · HLS.js · FFmpeg · Docker*
• Built a Netflix-style video streaming platform with adaptive HLS delivery across 1080p, 720p, and 480p quality levels.
• Implemented background video processing, Redis caching, watch history, recommendations, search, profiles, and performance-focused backend architecture.

EduCart — E-Commerce Platform *React.js · FastAPI · MySQL · JWT · CI/CD · Vercel*
• Built a full-stack e-commerce platform with authentication, product management, cart/checkout workflows, and admin controls.
• Optimized MySQL schema performance and deployed automated CI/CD pipelines using GitHub Actions and Vercel.

TuneBox — Music Streaming Application *Flutter · REST APIs · Provider · Postman*
• Contributed to a Flutter-based music streaming application by developing reusable audio components and integrating playback APIs.
• Reduced frontend code duplication by 40% through reusable UI abstraction and improved state management patterns.
