SUMMARY

AI/ML Engineer at SVYPE and Founder & Lead Engineer of Zeploy Tech. I build AI systems that connect models, data, APIs and backend infrastructure into working products: a multimodal interview-evaluation pipeline (MockAI), an adaptive streaming platform load-tested to 500 concurrent users (ZePlay), and an AI travel platform with server-side pricing (FlightOne).

EXPERIENCE

AI/ML Engineer · **SVYPE** — Jul 2026 – Present · Lahore (Hybrid)

- Develop and integrate AI capabilities across internal platforms and client-facing products, covering model integration, data preparation, evaluation and backend implementation.
- Integrate LLMs and machine learning models into existing products through Python backend services and APIs.

Full Stack Development Intern · **SVYPE** — May 2026 – Jul 2026 · Remote

- Built frontend and backend features for JavaScript web apps and REST APIs connected to databases.
- Built ZePlay and contributed to TuneBox (Flutter); promoted to AI/ML Engineer on completion of the internship.

Founder & Lead Engineer · **Zeploy Tech** — Apr 2026 – Present · Lahore (Remote)

- Lead engineering and delivery of web, backend and AI products, from requirements and system architecture through implementation and deployment.
- Built zeploy.tech and Zee, a Gemini-powered assistant with streaming responses and automatic model fallback.

Co-Founder & COO · **100 Se Support** — Jan 2021 – Present · Khairpur, Sindh (Hybrid)

- Lead operations for a community welfare initiative: request verification, volunteers and accountable records.

SELECTED PROJECTS

MockAI — multimodal AI interview evaluation · FastAPI · React · MongoDB · DistilBERT · FERPlus · Speech-to-Text — Final year project · 2026

- System that scores each recorded answer on content (DistilBERT), delivery (speech pace, pauses, fillers) and composure (YuNet + FERPlus), fused 50 / 30 / 20 into an explainable report.
- Background evaluation worker, graceful degradation for missing camera or microphone, difficulty-weighted scoring; tested end to end.

ZePlay — adaptive video streaming platform · React · TypeScript · FastAPI · PostgreSQL · Redis · FFmpeg · k6 — SVYPE internship · 2026

- Background FFmpeg transcoding to 1080p, 720p and 480p HLS renditions for adaptive-bitrate playback.
- Raised throughput 7.7× (84 → 650 requests/s) at 500 concurrent users with 0% failures through Redis caching, GZip and multi-worker tuning (local k6 benchmark); keyset pagination cut deep-page SQL from ~295 ms to 0.27 ms; 59/59 backend tests passing.

FlightOne — AI travel platform · Next.js · React · Express · Prisma · PostgreSQL — 2026

- AI travel consultant (Ava) turns requests into typed trip parameters while the server computes every fare, so the model never generates prices; booking, tracking and servicing in one product.

Serene Management — hotel property management system · Next.js · TypeScript · Prisma · GitHub Actions — 2026

- Reservations, housekeeping, billing and night audit with per-property data isolation, server-side permissions, transactional billing and an audit trail.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Dart, Java, C#
AI / ML	Machine Learning, NLP, LLM Integration, Gemini API, DistilBERT, scikit-learn, Pandas, NumPy
Backend	FastAPI, Node.js, Express, REST API Design, JWT Auth, Redis, Background Jobs
Frontend	React, Next.js, Tailwind CSS, Flutter
Data & Tools	PostgreSQL, MongoDB, Prisma, Docker, GitHub Actions, FFmpeg, k6, Git, Linux

EDUCATION

BS Computer Science — 2023 – 2027
COMSATS University Islamabad, Lahore Campus
ML · Computer Vision · NLP · Databases

CERTIFICATIONS

Deep Learning Specialization — 2026
DeepLearning.AI · Coursera

Google AI Essentials — 2026
Google · Coursera
